

September 2019 Fuel Usage Report

In September you consumed 160.62% more than your neighbors.

Fuel Consumption

* Your neighbor is the average of other FNSB households participating in this study.

September 2019 Fuel Usage:

Total Usage: 16.035 gal

Price of Fuel: \$3.25/gal

Total Cost: \$52.11

In September:

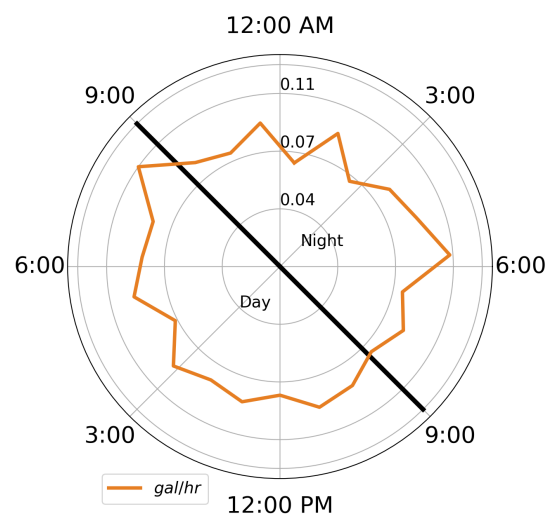

Your average fuel consumption for heating was 0.534 gallons per day.

Your average fuel cost for heating was \$1.74 per day.

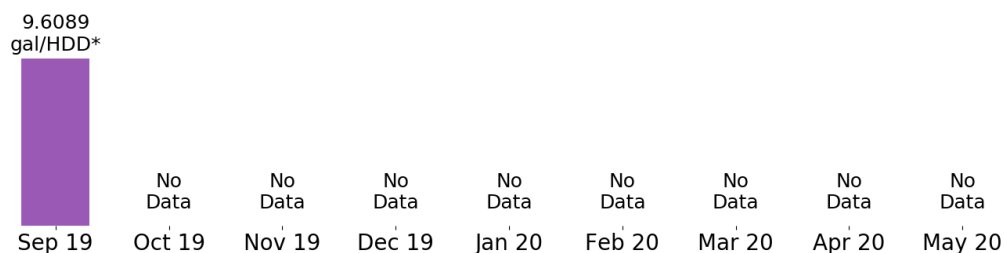

The average indoor temperature for this month was: 36.68 °F

The average outdoor temperature for this month was: 46.98 °F

Hourly Fuel Consumption

Track Your Progress:

Weather Adjusted Gallons per Month

*gal/HDD is the gallons of fuel consumed divided by the heating degree day during the time of consumption. Heating degree days for a given day are calculated by subtracting the day's average temperature from the base temperature of 65 °F.

Tip to Save Fuel

Consider reducing the set temperature on your heater. A one degree reduction in your set temperature results in about 2% savings on your fuel bill. The U.S. Department of Energy recommends setting your temperature to 68 degrees when you are at home and awake, and recommends turning down the temperature (by as much as 10 degrees) during the nighttime hours when you are asleep or when you are away from your home.
