

October 2019 Fuel Usage Report

In October you consumed 155.96% more gal/ft² than your neighbors.

Fuel Consumption per Area

* Your neighbor is the average of other FNSB households participating in this study.

October 2019 Fuel Usage:

Total Usage: 9.867 gal

Price of Fuel: \$3.04/gal

Total Cost: \$29.99

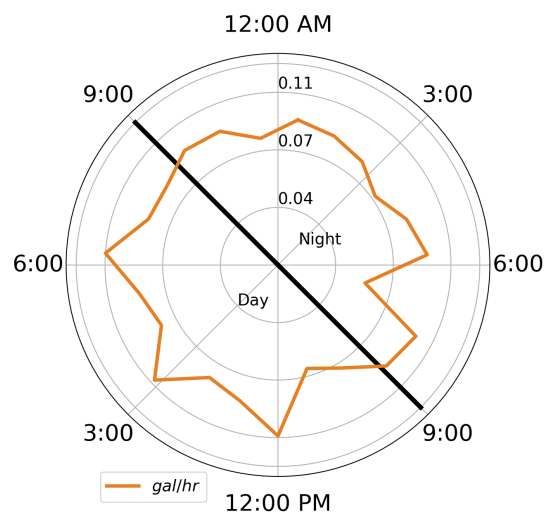

In October:

Your average fuel consumption for heating was 0.318 gallons per day.

Your average fuel cost for heating was \$0.97 per day.

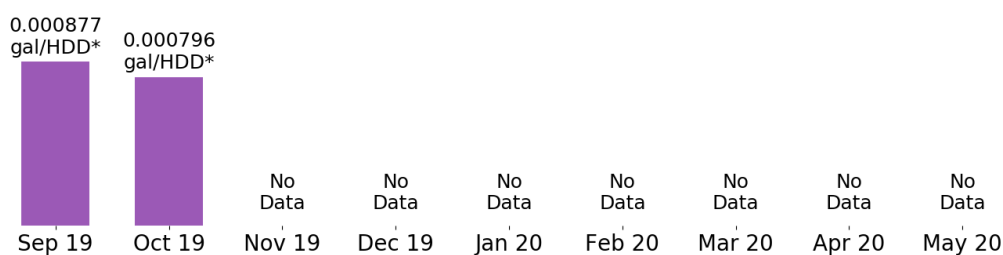

The average outdoor temperature for this month was: 35.93 °F

Hourly Fuel Consumption Rate

Track Your Progress:

You consumed 9.23% less this month than last month.

Temperature Adjusted Gallons per Month

*gal/HDD is the number of gallons of fuel used in a month divided by the total number of heating degree days in the month. Heating degree days for a given day are calculated by subtracting the day's average temperature from the base temperature of 65 °F.

Tip to Save Fuel

In cold climates, a great deal of heat can be lost through your windows during the winter. Using transparent interior plastic film over your windows can improve the thermal efficiency of your home. In a study conducted by the Cold Climate Housing Research Center, inexpensive interior plastic film improved the insulation of the tested window by 33%.
